

India selects Dassault Rafale for the Indian Navy

On 14 July 2023, the Indian Government announced the selection of the Navy Rafale to equip the Indian Navy with a latest-generation fighter. Following an international competition launched by the Indian authorities, this decision comes after a successful trial campaign held in India, during which the Navy Rafale demonstrated that it fully met the Indian Navy's operational requirements and was perfectly suited to the specificities of its aircraft carrier.

The Indian Navy's 26 Rafales will eventually join the 36 Rafales already in service, which are giving full satisfaction to the Indian Air Force, making India the first country to make the same military choice as France by operating both versions of the aircraft to help consolidate its superiority in the air and on the seas and guarantee its sovereignty. This selection confirms the excellence of the Rafale, the exceptional quality of the link between Dassault Aviation and the Indian Forces, and the importance of the strategic relationship

between India and France.

"As we celebrate the 70th anniversary of our partnership with the Indian Forces, I would like to thank the Indian authorities for this new mark of confidence and pledge, on behalf of

Dassault Aviation, that we will fully meet the Indian Navy's expectations with the Rafale", stated Eric Trappier, Chairman and CEO of Dassault Aviation.
